INFORMATION DISCLOSURE STATEMENT

Enclosed is the International Search Report (3 pages) from the European Patent Office as the international searching authority from the present international application listing 7 references and their relevant portions.

In the International Search Reports the references listed in category X means each document is of particular relevance; the claimed invention cannot be considered novel or can not be considered to involve an inventive step when the document is taken alone with respect to the listed claim. The references listed in category A mean that these references define the general state of the art which is not considered to be of particular relevance with respect to the listed claims. The International Search Report is also in English and points out relevance of the references so no further relevance is necessary

to be pointed out. One of the references, namely DE 85 02 308 is also disclosed and discussed on page 1+ in the specification.

Since the International Search Report is in English and the relevant portions of these references are pointed out there in English, and further the four US patents are in English, no further pointing out of relevance is needed.

Two PTO-1449 forms are presented listing all 11 references being submitted herewith including five references disclosed and discussed on page 1+ of the specification. Translations of the foreign language references are not available to the undersigned.

This submission meets the requirements of 37 CFR §1.56, 1.97 and 1.98(a) and MPEP 609.

Respectfully submitted  
Michael Abel, et al
